Wait, Why Are Manhole Covers¹ Round?

By Mirel Zaman

"If you were a tree, what kind would you be?" It's the type of inane question that many people would roll their eyes at if it were asked during an icebreaker exercise or on a first date. But for Sally Gibson, the question was posed someplace much, much worse: a job interview.

5 "I was completely thrown by it. I basically froze," recalls Gibson, the founder and owner of Someone Sent You A Greeting.

At the time, she kicked herself for not being more prepared for an off-the-wall question like this, because they'd become very popular in the early-2000s. Job seekers were told to expect to be asked things like: "How much does the Empire State Building weigh?" "How many golf balls would fit into a 747?" "Why are manhole covers round?"
10 or, a question immortalized in the 2013 film *The Internship*, "You're shrunk down to the size of nickels and dropped into the bottom of a blender. What do you do?"

Privately, however, Gibson has always considered this type of question basically useless. "You don't learn anything really insightful about the person you're
15 interviewing," she says.

The questions plagued job seekers across industries.

Considering the fact that they're nearly universally despised, you have to wonder why these questions exist in the first place. Their origin is actually a bit fuzzy. In the early-
20 aughts², prevailing wisdom was that they were used during Google interviews. But in a 2010 post on her website, Gayle Laakmann McDowell, who had been a software engineer at Google and served on the company's hiring committee, said that this wasn't true. "Years ago, rumors used to circulate about Microsoft interviews," she wrote.

In a 2013 interview with *The New York Times*, Laszlo Bock [...] simply said that studies
25 the company had conducted showed "that brain teasers are a complete waste of time... They don't predict anything. They serve primarily to make the interviewer feel smart."

Eric Cole, the founder of InterviewIQ, agrees.

He says that brain teasers are ostensibly designed to gauge³ a candidate's critical
30 thinking: As long as the person can walk the interviewer through their logic, their answer should count as "good," even if their actual answer to a question like "How many marbles would fit in the Louvre?" is wrong. But not every candidate has a thinking style that's well-suited for brain teasers, Cole says. There are much better ways to gauge a candidates' problem-solving style and critical-thinking skills than to ask them
35 a random riddle⁴, such as asking how people juggle competing priorities, how they best grow, the most useful lesson they've learned from a more senior colleague, or for an example of a time they made a mistake and how they handled it.

Brain teasers aren't just annoying. Cole says interviewers who rely on brain teasers
40 can sometimes *want* to make a candidate feel uncomfortable — and that information might give you useful insight into that company's culture.

¹ a manhole cover : une plaque d'égout

² (early) aughts : the first part of the decade 2000 to 2009

³ to gauge : évaluer

⁴ a riddle : devinette

As for Gibson, she says if someone asked her a similar question today, she thinks she'd be less easily thrown off her game — although she'd certainly be annoyed. "Having been through many interviews now I still don't see what you gain from a question like that. I definitely think they've had their time though and would be surprised to find interviewers still using them."
45 Now if only we could get interviewers to do away with, "So, where do you see yourself in five years?"
